

SAMMANSTÄLLNING AV UPPSALA UNIVERSITY BEHAVIORAL FACILITY

Uppsala University Behavioral Facility (UUBF) is a non-profit core facility, part of the technology platforms supported by strategic funding by the Faculty of Medicine and Pharmacy. UUBF provides facilities for behavioral testing of mice, rats and fish at BMC. We have protocols for different behavioral tests and can assist with the set-up of equipment for behavioral studies or perform whole experiments. In D1 at BMC, UUBF holds a working station including the software Ethovision XT for analyzing behavioral recordings. It is also possible to get an introduction of the program and help to analyze your videos. UUBF can also give advise in issues concerning behavioral testing, assist with statistics, data analyses and ethical applications. Please take a few minutes to answer these few questions to help us improve our future work at UUBF.

UUBF EXISTENCE

3. How did you find out that UUBF exists? (*Antal obesvarade = 2*)

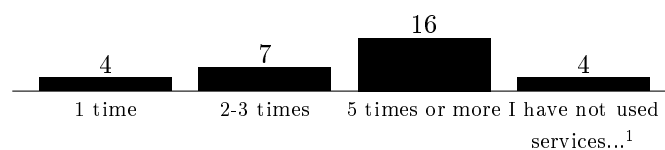

4. In other ways: (*Antal obesvarade = 27*)

- internt
- Known it from start
- Email advertisement
- It exists at my department

UUBF USAGE

5. How many times have you used services at UUBF?

¹ I have not used services from UUBF yet

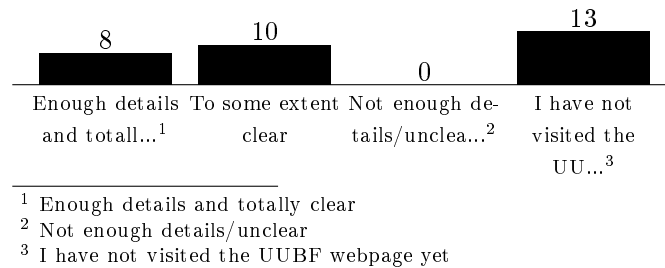

6. What can make you start using services from UUBF: (*Antal obesvarade = 18*)

- intro to ethovision
- Experiments requiring behavioural data, courses on behaviour analysis and methods introduction
- Going there and talking to Sarah.
- specific questions regarding behavior experiments/ equipment
- my research requirements
- need to improve behavioral experiments and data analysis
- Future experiments on fish behaviour
- Easy usage and user friendly schedule
- Help with Ethovision and behavioral facility equipment
- make me interest for behaviour
- Timelimits and if I get stuck!
- continuous information
- Behavioural setups that can improve what I am already doing, for example if Ethovision cameras could detect and score itching, instead of having to do it manually.

UUBF WEBPAGE

7. What do you think about the information on the webpage?

8. Proposals for improvement: (*Antal obesvarade = 25*)

- Offer courses on behavioural analysis. Improve the Swedish version of the Rotarod SOP, could probably benefit from some language polishing.
- providing a bit more details regarding the behavioral tests
- translate to english, we are an international university.
- some more interaction with scientist, maybe in form of seminars every 3rd month
- Open the webpage for researcher outside UU
- Could have more information on what specific models and tools are available

UUBF SERVICE

9. How do you perceive the service that you have received from UUBF? (*Medel = 4,8, SD = 1,6*)
(1 = Not good, 5 = Very good)

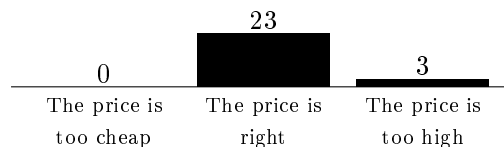

10. Proposals for improvement: (*Antal obesvarade = 29*)

- We could have standardised meetings every 6 months to at least know each other, our resources, our problems and general working structure of the UUBF.
- english

UUBF PRICING

11. What do you think about the price of our service? (*Antal obesvarade = 6*)

12. Proposals about the price: (*Antal obesvarade = 28*)

- I have no idea about the prices.
- I would use UUBF even if the price was a bit higher
- I have not seen The invoice...

UUBF FUTURE WORK

13. In order to develop our future work and services at UUBF, we would like to know what you wish for the future: (*Antal obesvarade = 23*)

- Perhaps advertise more that it exists and what help you can get.
- additional equipment for behavior tests
- seminars and lectures in animal training and behavior. include the UUBF in educational training.
- 1. It will be good if you can provide us to install softwares on our computer for learning sake.
- Continue to offer equipment for behavioral tests. Offer more tests. The possibility to use the Ethovision system is very good.
- More computers to use ethovision on. Sometimes the computer is fully booked and it is impossible to analyse my movies.
- have prices compatible to the meager grants available in sweden
- That you remain in place

THANK YOU FOR YOUR PARTICIPATION!
